

RFID ME™ Software Development Kit

Product Overview

The RFID ME™ Software Development Kit provides a simple, easy to use, .NET interface for the RFID ME™ family of readers from MTI. The SDK will allow Microsoft Visual Studio developers to rapidly deploy solutions for the RFID ME™ USB Dongle, the READ ME™ (RU-824) and the RU-861. Supporting Visual Basic and C#, it comes with sample programs for each and integrates the low level USB HID communications required by the reader.

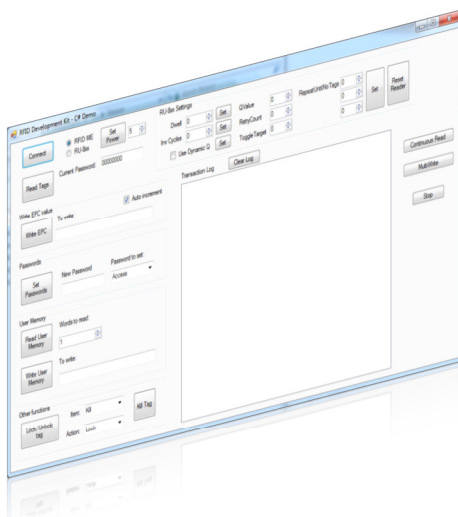

Features

- Full .NET Support
- EPC and user memory read and write functionality
- Tag lock, kill and password control for the RFID ME™ USB Dongle, READ ME™ (RU-861 coming soon!)
- Reader controls (power, antenna control, etc.)
- Embedded USB HID communications layer
- Comes with a demo copy of the RFID Wedge

Benefits

- Examples of VB and C# are included... get started quickly!
- No need to worry about the USB HID communications layer
- Easy to use interface, no need to learn the low level command set – it is embedded
- Initially developed at the Ohio University AIDC Lab
- Free email support

About BAIT Consulting

We are a technology and vendor agnostic consulting and software company. Our goal is to help you to become more productive, efficient and profitable. We do this by leveraging today's technologies with tomorrow's concepts to allow you to realize the benefits of ALL of the automatic identification technologies (bar codes, RFID, biometrics, magnetic stripe, etc.).

Get Started

To get started visit us at www.bait-consulting.com/RFIDMESDK.aspx to download your copy today or contact your local MTI distributor.
